Acknowledgements	2
Zusammenfassung	4
Summary	9
Chapter 1	13
Aims and structure of the thesis	13
1.1 Introduction	14
1.2 Objectives	15
1.3 Structure of the thesis	16
1.4 References	17
Chapter 2	21
Literature review	21
2.1 The pea crop and production problems	23
2.1.1 Weeds in organic peas	24
2.1.2 Pea diseases and pests.....	26
2.1.2.1 Soil and seed-borne diseases.....	26
2.1.2.2 Foliar diseases.....	28
2.1.2.3 Insect pests.....	31
2.1.3 Effects of poor soil conditions on peas	32
2.2 Management approaches to improve organic pea production	35
2.2.1 Effects of intercropping with cereals on weeds and soil-borne diseases	36
2.2.2 Effects of reduced tillage on weeds and diseases	38
2.2.3 Effects of biofumigation on weeds and soil-borne diseases	42
2.3 Concluding remarks	47
2.4 References	48
Chapter 3	65
Seed-health of organic peas and faba beans and its effects on the seed-borne pathogens on the harvested grains	65
3.1 Introduction	66
3.2 Materials and methods	69
3.2.1 Origin and processing of seed samples.....	69
3.2.2 Seed germination	69
3.2.3 Identification of seed-borne pathogens.....	69
3.2.4 Data processing and analysis.....	72
3.3 Results.....	73
3.3.1 Seed germination	73
3.3.2 Peas	73
3.3.3 Faba beans.....	74
3.4 Discussion	75
3.5 Conclusions	78
3.6 References	79
Chapter 4	97
Effects of intercropping with oats, the use of different biofumigation brassica cover crops and reduced tillage on weed pressure and yield of spring peas and oats and a subsequent winter wheat crop	97
4.1 Introduction	98
4.2 Materials and methods	103
4.2.1 Field site	103

4.2.2 Experimental design	103
4.2.3 Assessments	104
4.2.4 Soil sampling and N _{min}	104
4.2.5 Statistical Analysis	105
4.3 Results.....	107
4.3.1 Soil nitrogen dynamics over time	107
4.3.2 Plant development and biomass without grain for peas and oats.....	107
4.3.3 Weeds in peas and oats	108
4.3.4 Final yield.....	109
4.3.4.1 Grain yield of peas, oats and subsequent wheat	109
4.3.4.2 Yield components	110
4.4 Discussion	112
4.6 Concluding remarks	116
4.7 References	117
Chapter 5	137
Effects of different biofumigant brassica species, reduced tillage, and mixed cropping with oats on pea foot diseases and insect infestation	137
5.1 Introduction	138
5.2 Materials and methods	142
5.2.1 Root disease assessments	142
5.2.2 Root pathogen identification	142
5.2.3 Foliar insect and disease assessments	143
5.2.4 Statistical Analysis	143
5.3 Results.....	144
5.4 Discussion	146
5.5 Concluding remarks	150
5.6 References	151
Chapter 6	171
General discussion and conclusions	171
6.1 General discussion	172
6.2 Concluding remarks	177
6.3 References	178
7 Appendix of tables.....	183
A7.1 Chapter 3; Appendix of tables	184
A7.2 Chapter 4; Appendix of tables	185
A7.3 Chapter 5; Appendix of tables	203
A7.4 Chapter 6; Appendix of tables	205
8 Appendix of figures	207
A8.1 Chapter 3; Appendix of figures	208
A8.2 Chapter 4; Appendix of figures	216
