

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	State of the art and applications of GaN-based laser diodes . . . . .	2
1.2	Basic principles of laser diodes . . . . .	4
1.3	Structure of this PhD thesis . . . . .	5
<b>2</b>	<b>Front-end processing of GaN-based laser diodes</b>	<b>7</b>
2.1	Technology roadmap . . . . .	8
2.2	The quick broad area fabrication process . . . . .	8
2.3	The ridge-waveguide process – an overview . . . . .	10
2.4	Definition of narrow ridge-waveguides . . . . .	11
2.4.1	Ridge lithography optimization . . . . .	13
2.4.2	Ridge etching with resist mask . . . . .	19
2.4.3	Pd patterning issues . . . . .	22
2.4.4	Silicon nitride mask for ridge etching . . . . .	25
2.4.5	Metal mask . . . . .	26
2.4.6	Self-aligned ridge waveguide process . . . . .	27
2.5	Low-temperature n-contacts on N-face GaN . . . . .	37
2.5.1	Definition of the target resistance and process constraints . . . . .	38
2.5.2	Surface preparation and fabrication of the contacts . . . . .	39
2.5.3	Comparison of the contact performances . . . . .	41
2.6	Conclusions and outlook . . . . .	45
<b>3</b>	<b>Fabrication of laser facets with defined reflectance</b>	<b>47</b>
3.1	Technology roadmap . . . . .	47
3.2	Scribe and break theory . . . . .	48
3.3	Thinning of GaN wafers . . . . .	49
3.4	Laser scribing and manual cleaving . . . . .	53
3.5	Machine-assisted diamond scribing and cleaving: <i>edge-scribe</i> . . . . .	56
3.5.1	Scribing parameters . . . . .	57
3.5.2	Breaking parameters . . . . .	59
3.5.3	Surface topology . . . . .	60
3.5.4	Discussion of the results: facet quality . . . . .	61

3.6 Alternative scribing and cleaving methods . . . . .	64
3.6.1 The <i>skip-and-scribe</i> method . . . . .	65
3.6.2 Etched cleaving streets . . . . .	67
3.7 Mirror coatings . . . . .	70
3.7.1 Dielectric mirrors and anti-reflection coatings . . . . .	70
3.7.2 Design of mirror-coatings for blue-violet GaN laser diodes . . . . .	71
3.8 Influence of the facet reflectance on the lasing threshold . . . . .	74
3.8.1 Analytical calculation of the threshold current . . . . .	74
3.8.2 Internal losses, modal gain parameter and transparency current density . . . . .	75
3.8.3 Dependence of the threshold current on the facet reflectance . . . . .	77
3.9 Conclusions and outlook: facet cleaving and coating . . . . .	79
<b>4 The impact of the ridge-waveguide depth on the lasing performance</b>	<b>81</b>
4.1 Contributing scientists . . . . .	82
4.2 Measurement of the laser threshold and the lateral far field patterns . . . . .	82
4.3 Self-consistent simulation . . . . .	85
4.4 Current spreading . . . . .	87
4.5 Study of antiguide effects with a 2D mode solver . . . . .	89
4.5.1 Theoretical model . . . . .	90
4.5.2 Simulation results and discussion . . . . .	95
4.5.3 Lateral far-field patterns . . . . .	104
4.5.4 2D mode solver results summary . . . . .	104
4.6 Quantitative study of antiguide . . . . .	105
4.6.1 Self-consistent simulation with linear $dn/dN$ coefficient . . . . .	106
4.6.2 Self-consistent simulation by constant $R$ . . . . .	107
4.6.3 Experimental determination of the SRH coefficient $A$ , the internal losses $\alpha_i$ and the antiguide factor $R$ . . . . .	109
4.7 Antiguide effects in wider RW laser diodes . . . . .	112
4.8 Conclusions . . . . .	113
<b>5 Longitudinal mode selection in GaN laser diodes</b>	<b>115</b>
5.1 Technology roadmap . . . . .	116
5.2 External cavity system with mode selection . . . . .	116
5.2.1 Littrow and Littman-Metcalf configurations . . . . .	117
5.2.2 Blue-violet emitting ECDL systems . . . . .	118
5.3 Integrated Bragg gratings for GaN laser diodes . . . . .	120
5.3.1 Design of high-order Bragg-gratings in GaN . . . . .	121
5.3.2 Process technology for high-order Bragg-gratings in GaN . . . . .	124
5.4 Conclusions and outlook . . . . .	133
<b>6 Summary of the results and outlook</b>	<b>135</b>
