## Table of contents

<b>List of tables .....</b>	<b>v</b>
<b>List of figures .....</b>	<b>vii</b>
<b>Summary .....</b>	<b>ix</b>
<b>Zusammenfassung .....</b>	<b>xiii</b>
<b>List of acronyms .....</b>	<b>xvii</b>
<b>1 Introduction.....</b>	<b>1</b>
<b>1.1 Background .....</b>	<b>4</b>
<b>1.2 Problem setting and motivation .....</b>	<b>8</b>
<b>1.3 Study objectives .....</b>	<b>11</b>
<b>1.4 Significance of the study.....</b>	<b>12</b>
<b>1.5 Outline of dissertation .....</b>	<b>13</b>
<b>2 Literature review on the determinants of willingness-to-pay for organic food products.....</b>	<b>15</b>
<b>2.1 Introduction .....</b>	<b>15</b>
<b>2.2 Economic valuation from a social science perspective: a review of empirical studies .....</b>	<b>17</b>
2.2.1 Information and product-related factors linked to organic food products .....	18
2.2.2 Socio-economic and demographic determinants.....	20
2.2.3 Consumer knowledge and awareness.....	23
2.2.4 Consumer perceptions and attitudes.....	25
2.2.5 Trust as a determinant of consumer behaviour under uncertainty .....	28
<b>2.3 Consumer preferences and consumer heterogeneity regarding organic food ...</b>	<b>31</b>
<b>2.4 Willingness-to-pay for organic food.....</b>	<b>38</b>
<b>2.5 Chapter conclusions .....</b>	<b>42</b>
<b>3 Theoretical framework and economic model .....</b>	<b>45</b>
<b>3.1 Theoretical framework of decision making and choice behaviour .....</b>	<b>46</b>
3.1.1 Stated preference models and an overview of methods .....	48
3.1.2 Discrete-choice theory.....	53
3.1.2.1 <i>Random utility model</i> .....	53
3.1.2.2 <i>Heterogeneity of consumer preferences</i> .....	57
3.1.3 Starting point bias in choice experiments .....	58
<b>3.2 Conceptual framework.....</b>	<b>62</b>

<b>3.3 Econometric choice modelling.....</b>	<b>64</b>
3.3.1 Mixed logit .....	64
3.3.2 Latent class .....	68
3.3.3 Willingness-to-pay .....	71
<b>4 Survey design and data description for organic food products.....</b>	<b>73</b>
<b>4.1 Identification of organic food attributes and levels .....</b>	<b>73</b>
<b>4.2 Designing a discrete-choice experiment.....</b>	<b>83</b>
<b>4.3 Survey design and survey instrument.....</b>	<b>88</b>
4.3.1 Sample size and data collection.....	88
4.3.2 The survey instrument.....	89
4.3.2.1 <i>The questionnaire</i> .....	89
4.3.2.2 <i>The choice experiment with starting point bias</i> .....	90
<b>4.4 Sample characteristics and data description.....</b>	<b>91</b>
4.4.1 Expected signs of the attribute variables.....	91
4.4.2 Socio-economic and demographic characteristics .....	92
4.4.3 Knowledge about organic foods.....	96
4.4.4 Risk perceptions .....	97
4.4.4.1 <i>Principal component analysis</i> .....	98
4.4.4.2 <i>Risk perceptions among German consumers</i> .....	100
4.4.5 Determinants of trust .....	102
4.4.5.1 <i>Analysis of ordered choices</i> .....	102
4.4.5.2 <i>Results of the ordered probit model for trust</i> .....	105
<b>4.5 Chapter conclusion .....</b>	<b>107</b>
<b>5 Organic food preferences, willingness-to-pay and discussion.....</b>	<b>109</b>
<b>5.1 Comparison of choices.....</b>	<b>109</b>
<b>5.2 Empirical results from the choice experiments .....</b>	<b>112</b>
5.2.1 Results from the conditional logit model .....	112
5.2.1.1 <i>Simulation results from conditional logit model</i> .....	116
5.2.1.2 <i>Results for interactions in the conditional logit model</i> .....	120
5.2.2 Results from the mixed logit model .....	126
5.2.3 Willingness-to-pay estimates from the mixed logit model .....	137
5.2.4 Results from the latent class model .....	152
5.2.5 Class-specific willingness-to-pay estimates from the latent class model .....	157

<b>6</b>	<b>Preference anomalies and preference elicitation .....</b>	<b>159</b>
<b>7</b>	<b>Conclusions .....</b>	<b>165</b>
<b>7.1</b>	<b>Summary of results.....</b>	<b>165</b>
<b>7.2</b>	<b>Implications for agricultural policy-makers and providers of organic food ...</b>	<b>168</b>
<b>7.3</b>	<b>Prospects for future research .....</b>	<b>169</b>
	<b>References .....</b>	<b>171</b>
	<b>Appendices .....</b>	<b>I</b>
<b>A1</b>	<b>Welfare analysis.....</b>	<b>I</b>
<b>A2</b>	<b>Consumer perceptions and attitudes about organic food.....</b>	<b>II</b>
<b>A3</b>	<b>Choice sets for apples (sample B), milk (samples A and B), and beef (samples A and B).....</b>	<b>III</b>
<b>A4</b>	<b>Questionnaire (for block 1, sample A) .....</b>	<b>X</b>
<b>A5</b>	<b>Descriptive statistics for the attitude items .....</b>	<b>XXV</b>
<b>A6</b>	<b>Ordered logit model .....</b>	<b>XXXIV</b>
<b>A7</b>	<b>Maximum likelihood estimates obtained from conditional logit for apples, milk, and beef (pooled and gender-specific samples) .....</b>	<b>XXXV</b>
<b>A8</b>	<b>Doubling the observed values of the price attributes for all products .....</b>	<b>XXXIX</b>
<b>A9</b>	<b>Simulations of changes in apple, milk, and beef attributes .....</b>	<b>XLI</b>
<b>A10</b>	<b>Marginal effects for milk and beef attributes .....</b>	<b>XLVII</b>
<b>A11</b>	<b>Gender-specific estimates obtained from mixed logit (without starting point bias) .....</b>	<b>XLIX</b>
<b>A12</b>	<b>Correlations .....</b>	<b>LIV</b>
<b>A13</b>	<b>Preference distributions.....</b>	<b>LVI</b>
