

TABLE OF CONTENTS

LIST OF FIGURES	vii
LIST OF TABLES	viii
LIST OF APPENDICES	ix
SUMMARY	x
ZUSAMMENFASSUNG	xi
CHAPTER I General Introduction	1
Tropical montane forests	2
Anthropogenic alterations to the global N and P cycles	2
Impacts of elevated nutrient deposition in tropical forests	4
The N cycle	5
Hypotheses	8
Project objectives	10
CHAPTER II Responses of soil nitrogen cycling to nutrient inputs in montane forests along a 3000-m elevation gradient in the Ecuadorian Andes	13
Abstract	14
Introduction	15
Materials and Methods	18
Site description and soil characteristics	18
Gross rates of N production and retention	20
Other supporting variables	21
Statistical analysis	22
Results	24
Gross rates in N production and retention in control forest soils	24
Nutrient addition effects on gross rates of N production and retention	25
Discussion	26
Patterns and controlling factors of gross rates of microbial N production and retention in control forest soils along the elevation gradient	26
Nutrient-addition effects on gross rates of microbial N production and retention	31
Conclusions	35
CHAPTER III Fluxes and fates of nitrogen in soils of old-growth montane forests in the Ecuadorian Andes with four years of elevated nitrogen input	39
Abstract	40
Introduction	42
Materials and Methods	44
Site description and experimental design	44

Soil characteristics	45
¹⁵ N pulse-chase tracing	46
Calculations and statistical analysis	49
Results	50
Soil N pools and the dynamics of ¹⁵ N tracers in the control forests	50
N addition effects on the soil N pools and the dynamics of ¹⁵ N tracers	56
Discussion	60
Fluxes and fates of mineral N in control forests	61
Changes in fluxes and fates of N with four years of N addition	65
Conclusions	67
Appendices to Chapter III	68
CHAPTER IV Synthesis of results and implications of thesis	77
Soil N availability in montane forests in the Ecuadorian Andes	78
Gross fluxes of internally produced N in montane forests in the Ecuadorian Andes	80
Implications of results under increasing anthropogenic nutrient deposition	83
References	84
ACKNOWLEDGEMENTS	96
