

Table of Contents

1 Introduction.....	2
2 Fundamental Considerations.....	5
2.1 NbSi alloys.....	5
2.2 Amorphous Silicon.....	7
2.3 Niobium doped silicon.....	8
2.4 Metal-semiconductor interfaces.....	11
2.5 Josephson effect.....	13
2.6 Magnetic field effects in Josephson junctions.....	14
2.7 The RCSJ model.....	18
2.8 Josephson junctions with semiconductor barrier.....	21
2.9 AC Josephson voltage standards.....	26
3 Sample preparation.....	28
3.1 Deposition of NbSi films.....	28
3.2 NbSi composition monitoring.....	29
3.3 Transmission electron micrography.....	31
3.4 Circuit fabrication.....	34
4 Experimental set-up.....	37
4.1 Measurement techniques.....	37
4.2 Liquid helium dewar.....	39
4.3 Refrigerator cryostat.....	40
5 Measurement results and discussion.....	42
5.1 NbSi deposition parameters.....	42
5.2 Resistivity measurements on NbSi stripes.....	54
5.3 Measurements on Josephson junctions.....	57
5.3.1 The a-Si junction barrier at different temperatures.....	60
5.3.2 The NbSi junction barrier at different temperatures.....	63
5.3.3 Influence of magnetic fields on NbSi junctions.....	71
5.3.4 Capacitance of NbSi junctions.....	79
5.3.5 NbSi junctions under microwave irradiation.....	83
6 Summary and prospects.....	86
7 Bibliography.....	89
8 Index of Figures.....	94
9 Acknowledgements.....	97
