
Table of Contents:

1	Motivation.....	5
2	Basic properties of MgB ₂	10
2.1	Structure and bonding	10
2.2	Thermodynamics and kinetics	11
2.3	Superconducting properties of MgB ₂	12
	<i>Upper critical field and irreversibility field</i>	13
	<i>Flux pinning and doping</i>	14
	<i>Critical current density</i>	15
2.4	State of the art – <i>ex situ</i> conductors	16
3	Preparation and analysis techniques	21
3.1	Powder prepared by high energy ball milling	21
3.2	Bulk preparation	22
3.3	Powder in Tube method	24
3.4	Microstructure analysis.....	26
	<i>Optical microscopy</i>	26
	<i>Electron microscopy</i>	26
	<i>Thermal analysis</i>	27
	<i>X-ray diffraction (XRD) and Rietveld analysis</i>	28
3.5	Magnetic measurements	30
3.6	Transport measurements	32
	<i>Resistance measurements with PPMS</i>	32
	<i>Critical current measurements</i>	33
4	Alternative usage of <i>ex situ</i> MgB ₂ as a chemical barrier for Cu-sheathed conductors.....	34
4.1	Preparation of the <i>ex situ</i> / <i>in situ</i> architecture of the wire with Glidcop® sheath.....	37
4.2	Influence of the heat treatment temperature on the efficiency of the <i>ex situ</i> barrier.....	38

4.3	Influence of the applied pressure on the effectiveness of the <i>ex situ</i> barrier.....	42
4.4	Summary	50
5	Properties of MgB ₂ conductors prepared by using MA <i>in-ex situ</i> powder..	52
5.1	Mechanically alloyed <i>in-ex situ</i> powder and bulk samples.....	53
5.2	Conductor with mechanically alloyed <i>in-ex situ</i> powder	57
5.3	Summary	59
6	Increasing critical current density of <i>ex situ</i> powder by high energy ball milling	61
6.1	Milling time influence on the powder properties.....	63
6.2	Investigation of the MgB ₂ phase stability	64
6.3	Bulk properties as function of milling time.....	70
6.4	Conductor preparation.....	73
6.5	Influence of heat treatment on microstructure and superconducting properties of the conductors	74
7	<i>Ex situ</i> conductors with carbon addition.....	80
7.1	Precursor powders with carbon addition.....	81
7.2	Bulks with carbon addition.....	84
7.3	Monofilament tapes with 20 h milled powders	88
7.4	Summary	93
8	Conclusions.....	95
9	Acknowledgements	99
10	Symbols.....	100
11	References.....	102
12	List of publications.....	116
