## Table of content

List of abbreviations.....	V
List of figures.....	VII
List of tables.....	XI
<b>CHAPTER I: General introduction.....</b>	<b>1</b>
1. Introduction.....	1
2. Literature review.....	2
2.1. The adipokine adiponectin.....	2
2.1.1. Adiponectin structure and expression.....	2
2.1.2. Adiponectin receptors and signaling.....	4
2.2. Importance of adiponectin in cattle.....	6
2.2.1. The transition period.....	6
2.2.2. Immune status of cows during the transition period.....	7
2.2.1.2. Adiponectin in reproduction.....	8
2.2.4. Physiological regulation of milk production.....	11
2.2.5. Ontogenesis of adiponectin secretion.....	12
3. Objectives.....	14
<b>CHAPTER II: Methodological developments and first pilot studies.....</b>	<b>15</b>
1. Development, validation and first application of a semi-quantitative Western blot for bovine adiponectin.....	17
1.1. General set-up.....	17
1.2. Validation of the semi-quantitative Western blot protocol.....	18
1.3. Application of the semi-quantitative Western blot protocol to characterize the concentration of adiponectin during lactation in serum and milk of dairy cows.....	19
1.3.1. Animals and blood and milk sampling.....	19
1.3.2. Sample preparation and Western blot.....	20
1.3.3. Statistical analyses.....	20
1.3.4. Results and discussion.....	20

2. Development, validation and first application of the qualitative (semi-native) Western blot protocol for bovine adiponectin.....	23
2.1. General set up of the semi-native Western blot .....	23
2.2. Validation of the semi-native Western blot protocol .....	24
2.3. First application of the semi-native Western blot protocol to characterize the molecular weight distribution of adiponectin during lactation in serum and milk of dairy cows .....	26
2.3.1. Animals and serum sampling.....	26
2.3.2. Sample preparation and Western blot procedure .....	27
2.3.3. Results and discussion .....	27
<b>CHAPTER III: Molecular weight patterns of adiponectin in different body fluids and tissues estimated by semi-native Western blot .....</b>	<b>29</b>
1. Adiponectin molecular weight pattern in milk and serum samples from experimentally-induced mastitis .....	29
2. Adiponectin molecular weight patterns in visceral and subcutaneous adipose tissue depots and mammary gland.....	30
3. Adiponectin molecular weight patterns in cerebrospinal fluid (CSF) .....	34
4. Adiponectin in <i>Bovidae</i> other than <i>Bos taurus</i> .....	36
5. Adiponectin molecular weight patterns in allantoic fluid of dairy cows .....	37
<b>CHAPTER IV: Manuscript (accepted by <i>Theriogenology</i>) .....</b>	<b>40</b>
<b>CHAPTER V: Recombinant production of adiponectin and functional studies .....</b>	<b>62</b>
1. Material and methods .....	62
1.1. Vector generation with IBA Star Gate Cloning .....	62
1.1.1. Donor vector generation .....	62
1.1.2. Verification of the correct insertion of adiponectin by restriction analysis .....	64
1.1.3. Destination vector generation and transformation in <i>E. coli</i> .....	65
1.2. Protein overexpression in <i>E. coli</i> .....	65
1.3. Protein purification .....	66
1.3.1. Sonication procedure .....	66
1.3.2. Purification of His-tag adiponectin .....	67
1.3.3. Concentration and buffer exchange .....	68
1.4. Endotoxin removal .....	69

1.4.1. Limulus Amebocyte Lysate Test .....	69
1.5. Application of recombinant adiponectin to test its effects on lymphocyte proliferation .....	70
1.5.1. Animals .....	70
1.5.2. Isolation of peripheral blood mononuclear cells .....	71
1.5.3. Isolation of monocytes and lymphocytes .....	71
1.5.4. Isolation of granulocytes.....	72
1.6. Test protocol for assessing lymphocyte proliferation .....	72
1.6.1. Preliminary testing the effect of LPS on lymphocyte stimulation .....	73
1.6.2. Testing the effect of adiponectin on lymphocyte proliferation .....	73
1.7. Statistical analysis of the lymphocyte proliferation test .....	74
2. Results and Discussion .....	74
2.1. Production of bovine recombinant adiponectin .....	74
2.1.1. Amplification of the adiponectin gene .....	74
2.1.2. Verification of the donor vector.....	75
2.1.3. Analysis of the destination vector.....	76
2.2. Overexpression of the adiponectin protein in <i>E. coli</i> TOP10 cells.....	77
2.2.1. Confirmation of adiponectin expression in different vectors .....	77
2.2.2. The appearance of adiponectin in different expression forms.....	78
2.3. Adiponectin purification with Ni-TED resin .....	78
2.4. Endotoxin contamination.....	81
2.5. Immunological test .....	83
2.5.1. Isolation of peripheral mononuclear cells .....	83
2.5.2. Isolation of monocytes and lymphocytes .....	84
2.5.3. Isolation of granulocytes.....	85
2.6. Lymphocyte proliferation test.....	86
2.6.1. Influence of lipopolysaccharide (LPS) contamination on lymphocyte proliferation .....	86
2.6.2. Effects of recombinant bovine adiponectin on lymphocyte proliferation.....	86
<b>CHAPTER VI: General discussion and conclusion .....</b>	<b>88</b>
Summary .....	90
Zusammenfassung .....	94
