Contents

1	Introduction	1
1.1	Motivation and formulation of the problem	1
1.2	This thesis	3
2	Fundamentals	5
2.1	Content	5
2.2	The equations of motion	6
2.2.1	Specific pressure gradient force	7
2.2.2	Outer force - gravity	7
2.2.3	Internal forces	7
2.2.4	Navier-Stokes equation	8
2.2.5	The rotating system	8
2.3	The continuity equation	10
2.4	Dimensionless numbers	11
2.5	Properties of inertial waves	11
2.5.1	Governing equations	11
2.5.2	Dispersion relation	13
2.5.3	Phase and group velocity	14
2.5.4	Reflection on rigid boundaries - effect of focussing	16
2.6	Wave rays and attractors	17
2.7	Mixing of angular momentum	19
2.8	Taylor-Proudman theorem	20
3	Current state of research	21
4	Experimental setup	25
4.1	Mechanical design	25
4.2	Technical aspects of the apparatus	28
4.3	Sensors and control unit	33

5	Measuring technique	35
5.1	Qualitative measurements	35
5.1.1	Setup	36
5.2	Quantitative measurements - Particle Image Velocimetry (PIV)	37
5.2.1	Fundamentals of a basic planar 2D PIV system	38
5.2.2	Setup	40
6	Methods of analysis	43
6.1	Harmonic analysis	44
6.1.1	Assimilation to the experiment	46
6.2	Modus operandi	47
6.2.1	Qualitative measurements - kalliroscope	47
6.2.2	Quantitative measurements - PIV	48
7	Results	53
7.1	Flow pattern	53
7.2	Comparison of theory and experimental results - wave pattern and attractors	55
7.2.1	Frustum libration	56
7.2.2	Lids plus outer cylinder libration	58
7.2.3	1/1 attractor seen in PIV measurements	59
7.3	Mean flows	62
7.4	Efficiency of wave excitation	67
7.5	Influence of excitation amplitude	70
8	Wave-mean flow interaction	73
8.1	Analogy between gravity and inertial waves	73
8.1.1	Gravity waves	73
8.1.2	Inertial waves	74
8.2	Analytical approach	75
8.2.1	Reynold's averaging	78
8.2.2	Vertical flux of zonal momentum	79
8.2.3	The mean flow equation	80
8.3	Numerical approach	81
8.3.1	Quasi-stationary mean flow investigations	83
8.3.2	Survey of time-dependent mean flows	88
8.4	Experimental long-time measurements	90
9	Conclusion	95

10 Publications and presentations	99
10.1 Publications	99
10.2 External Presentations	99
10.3 Internal Presentations	100
11 Bibliography	101
