Content

1 Introduction.....	1
2 Theoretical Background	3
2.1 Fundamentals of Plastic Deformation.....	3
Mechanism.....	3
Stages of Deformation	4
The Deformed State.....	6
Cell Formation.....	7
Non-Cell-Forming Metals.....	8
Microstructure Development of Two-Phase Materials.....	8
Severe Plastic Deformation.....	8
Equal Channel Angular Pressing.....	10
Confined Channel Die Pressing.....	11
2.2 Softening Mechanisms.....	12
Recrystallization.....	13
Nuclei Formation.....	14
Recovery.....	16
Grain Growth.....	20
Influence of Solid Solution on Recovery and Recrystallization.....	20
Influence of Second Phases on Recovery and Recrystallization.....	21
2.3 Precipitation and Solid Solution Hardening.....	22
Solid Solution Hardening.....	22
Precipitation Hardening.....	24
3 Experimental Procedure.....	29
3.1 Examined Material.....	29
AlMnFe.....	29
AlMg and AlZnMg Samples.....	30
3.2 Severe Plastic Deformation	33
Equal Channel Angular Pressing.....	33
Confined Channel Die Pressing.....	34
3.3 Characterization Methods.....	35
Micro Hardness Measurement.....	35
Mechanical Testing.....	35

Tensile Tests.....	36
Strain Rate Jump Tests.....	36
Optical Microscopy.....	37
Orientation Microscopy.....	37
Transmission Electron Microscopy.....	39
Macrotexture Measurement.....	39
4 Microstructure Formation and Structural Stability.....	42
4.1 Comparison of CCDP and ECAP.....	42
FEM Simulation.....	42
Microstructure.....	46
Discussion.....	50
4.2 Microstructure Development Due to Severe Plastic Deformation of AlMnFe.....	54
Results.....	54
Discussion.....	59
4.3 Structural Stability of AlMnFe.....	64
Hardness.....	64
Microstructure.....	65
Discussion.....	68
Conclusions.....	73
4.4 Microstructure Development Due to Plastic Deformation of AlMg and AlZnMg.....	73
Results.....	74
Discussion.....	78
Conclusions.....	79
4.5 Structural Stability of AlMg and AlZnMg.....	79
Hardness of AA5005 at 300°C.....	79
Microstructure of AA5005 at 300°C.....	81
Texture of AA5005 at 300°C.....	82
Hardness of AA5005 at 350°C.....	83
Microstructure of AA5005 at 350°C.....	84
Texture of AA5005 at 325°C.....	84
Hardness of AA7023 at 300°C.....	85
Microstructure of AA7023 at 300°C.....	86
Texture of AA7023 at 300°C.....	87

Hardness of AA7023 at 350°C.....	87
Microstructure of AA7023 at 350°C.....	88
Discussion.....	89
Conclusion.....	97
5 General Conclusions.....	98
6 Abstract.....	101
7 Zusammenfassung.....	103
8 References.....	105
