Table of contents

I. Zusammenfassung IX
II. Abstract XI
III. Index of tables XIII
IV. Index of figures XV
V. List of abbreviations, acronyms and symbols XXI
1. Introduction 1
1.1. State of the art of NO_x conversion 2
1.1.1. History of NO_x removal and conversion 2
1.1.2. Overview of NO_x removal catalysts 3
1.1.3. Availability, application, problems and limitations of the described processes 4
1.2. Motivation of this work 5
2. Theoretical background 7
2.1. Heterogeneous catalysis 7
2.1.1. Definition and history of heterogeneous catalysis 7
2.1.2. Principles of heterogeneous catalysis 7
2.1.3. Role of the catalytically active species 8
2.1.4. Role of the support 8
2.1.5. Adsorption of reactants at the catalyst surface and desorption of products 8
2.2. Characterization of catalysts 10
2.3. Decomposition mechanisms of nitrogen oxides 12
2.3.1. NO_x adsorption mechanisms 12
2.3.2. Non-catalytic NO_x decomposition 12
2.3.3. Catalytic NO_x decomposition 13
2.4. Chemical vapor infiltration 15
2.4.1. Introduction to CVI 15
2.4.2. Kinetics of CVI 16
2.4.3. Mechanisms of process control 17
2.5. Catalyst support materials 17
2.5.1. Activated carbons 18
2.5.2. Applied activated carbon support 18
2.5.3. Zeolites 19
2.5.4. Applied zeolite support 20

3. Experimental methods 25
3.1. Preparation of catalysts 25
3.1.1. Reactor setup 25
3.1.2. Precursors 27
3.1.3. Infiltration procedure 29
3.1.4. Reference catalysts 31
3.2. Structural and chemical investigation 36
3.2.1. Scanning electron microscopy 36
3.2.2. Transmission electron microscopy 37
3.2.3. Energy-dispersive X-ray spectroscopy 38
3.2.4. X-ray diffraction 39
3.2.5. Low temperature nitrogen adsorption (BET) 40
3.2.6. Thermal gravimetric analysis and differential thermal analysis 44
3.3. Catalytic investigation 44
3.3.1. NO_2 adsorption measurements 44
3.3.2. Recycle flow reactor 44
3.3.3. Kinetic studies 46
4. Results and discussion of activated carbon-based catalysts 51
4.1. Sample overview 51
4.2. Preparation parameter studies 52
4.3. Microscopic investigation of selected samples 56
4.4. Structural characterization 58
4.5. NO_x adsorption properties 62
4.6. Effect of the temperature on NO_x conversion 64
4.7. NO_x conversion properties 66
4.7.1. Nitric oxide conversion 67
4.7.2. Effect of the infiltrated metal 68
4.7.3. Effect of the preparation method 69
4.7.4. Effect of co-doping with silica 70
4.7.5. Effect of the pore volume 70
4.7.6. Time-resolved NO_x catalysis experiments 71
4.7.7. Elemental balances 73
4.7.8. Discussion 73
4.8. Structural changes during the catalysis process 75
4.9. Summary and conclusions 78

5. Results and discussion of zeolite-based catalysts 79
5.1. Sample overview 79
5.2. Preparation parameter studies 80
5.3. Microscopic investigation of selected samples 81
5.4. Structural characterization 84
5.4.1. Infiltration of the pore channels 84
5.4.2. Deposition in inter-crystallite pores 85
5.4.3. Pore size distribution 86
5.4.4. Crystallinity of the formed particles 86
5.5. NO_x adsorption properties 87
5.6. Effect of the temperature on NO_x conversion 88
5.7. NO_x conversion properties 90
5.7.1. Nitrogen dioxide and nitric oxide conversion 91
5.7.2. Effect of the infiltrated metal type 93
5.7.3. Effect of the zeolite framework type 93
5.7.4. Effect of the preparation method 94
5.8. Discussion of promising zeolite catalysts 95
5.8.1. Performance of the mordenite catalysts 96
5.8.2. Mass balances 98
5.8.3. Discussion 98
5.9. Structural changes during the catalysis process 101
5.9.1. Changes of the pore volume 101
5.9.2. Changes in the pore size distribution 102
5.9.3. Changes of the crystalline species 103
5.9.4. Discussion 104
5.10. Summary and conclusions 105
6. Summary and conclusions 107
7. Limitations of the study and further research outlook 109
8. References 111
9. Appendix 123
9.1. NO_x decomposition mechanisms in detail 123
9.1.1. NO_x decomposition mechanisms in activated carbon 123
9.1.2. NO_x decomposition mechanisms in metal-infiltrated activated carbon 125
9.1.3. Secondary product participation in the NO_x decomposition mechanism of activated carbons 125

9.2. Calibration routine of the mass spectrometer 126
9.3. Analysis routine of mass spectral data 130
9.4. Relation between micropore volume and gas species concentrations 134
9.5. Rating of the catalytic activity 135
9.6. Error estimation 137
9.7. List of samples and preparation parameters 138
9.8. Photographs of the experimental setup 140
10. List of publications 143
