Table of contents

I. Zusammenfassung	IX
II. Abstract.....	XI
III. Index of tables	XIII
IV. Index of figures.....	XV
V. List of abbreviations, acronyms and symbols	XXI
1. Introduction	1
1.1. State of the art of NO _x conversion.....	2
1.1.1. History of NO _x removal and conversion.....	2
1.1.2. Overview of NO _x removal catalysts	3
1.1.3. Availability, application, problems and limitations of the described processes	4
1.2. Motivation of this work	5
2. Theoretical background	7
2.1. Heterogeneous catalysis	7
2.1.1. Definition and history of heterogeneous catalysis	7
2.1.2. Principles of heterogeneous catalysis	7
2.1.3. Role of the catalytically active species	8
2.1.4. Role of the support.....	8
2.1.5. Adsorption of reactants at the catalyst surface and desorption of products.....	8
2.2. Characterization of catalysts.....	10
2.3. Decomposition mechanisms of nitrogen oxides	12
2.3.1. NO _x adsorption mechanisms.....	12
2.3.2. Non-catalytic NO _x decomposition	12
2.3.3. Catalytic NO _x decomposition	13
2.4. Chemical vapor infiltration.....	15
2.4.1. Introduction to CVI.....	15
2.4.2. Kinetics of CVI.....	16
2.4.3. Mechanisms of process control.....	17
2.5. Catalyst support materials	17
2.5.1. Activated carbons.....	18
2.5.2. Applied activated carbon support	18
2.5.3. Zeolites.....	19
2.5.4. Applied zeolite support	20

3. Experimental methods	25
3.1. Preparation of catalysts.....	25
3.1.1. Reactor setup.....	25
3.1.2. Precursors.....	27
3.1.3. Infiltration procedure	29
3.1.4. Reference catalysts.....	31
3.2. Structural and chemical investigation.....	36
3.2.1. Scanning electron microscopy	36
3.2.2. Transmission electron microscopy	37
3.2.3. Energy-dispersive X-ray spectroscopy	38
3.2.4. X-ray diffraction	39
3.2.5. Low temperature nitrogen adsorption (BET).....	40
3.2.6. Thermal gravimetric analysis and differential thermal analysis	44
3.3. Catalytic investigation	44
3.3.1. NO ₂ adsorption measurements.....	44
3.3.2. Recycle flow reactor	44
3.3.3. Kinetic studies.....	46
4. Results and discussion of activated carbon-based catalysts	51
4.1. Sample overview	51
4.2. Preparation parameter studies.....	52
4.3. Microscopic investigation of selected samples	56
4.4. Structural characterization	58
4.5. NO _x adsorption properties	62
4.6. Effect of the temperature on NO _x conversion	64
4.7. NO _x conversion properties.....	66
4.7.1. Nitric oxide conversion.....	67
4.7.2. Effect of the infiltrated metal	68
4.7.3. Effect of the preparation method	69
4.7.4. Effect of co-doping with silica.....	70
4.7.5. Effect of the pore volume.....	70
4.7.6. Time-resolved NO _x catalysis experiments.....	71
4.7.7. Elemental balances.....	73
4.7.8. Discussion	73
4.8. Structural changes during the catalysis process	75
4.9. Summary and conclusions	78

5. Results and discussion of zeolite-based catalysts	79
5.1. Sample overview	79
5.2. Preparation parameter studies	80
5.3. Microscopic investigation of selected samples	81
5.4. Structural characterization	84
5.4.1. Infiltration of the pore channels	84
5.4.2. Deposition in inter-crystallite pores	85
5.4.3. Pore size distribution	86
5.4.4. Crystallinity of the formed particles	86
5.5. NO _x adsorption properties	87
5.6. Effect of the temperature on NO _x conversion	88
5.7. NO _x conversion properties	90
5.7.1. Nitrogen dioxide and nitric oxide conversion	91
5.7.2. Effect of the infiltrated metal type	93
5.7.3. Effect of the zeolite framework type	93
5.7.4. Effect of the preparation method	94
5.8. Discussion of promising zeolite catalysts	95
5.8.1. Performance of the mordenite catalysts	96
5.8.2. Mass balances	98
5.8.3. Discussion	98
5.9. Structural changes during the catalysis process	101
5.9.1. Changes of the pore volume	101
5.9.2. Changes in the pore size distribution	102
5.9.3. Changes of the crystalline species	103
5.9.4. Discussion	104
5.10. Summary and conclusions	105
6. Summary and conclusions	107
7. Limitations of the study and further research outlook	109
8. References	111
9. Appendix	123
9.1. NO _x decomposition mechanisms in detail	123
9.1.1. NO _x decomposition mechanisms in activated carbon	123
9.1.2. NO _x decomposition mechanisms in metal-infiltrated activated carbon	125
9.1.3. Secondary product participation in the NO _x decomposition mechanism of activated carbons	125

9.2.	Calibration routine of the mass spectrometer	126
9.3.	Analysis routine of mass spectral data	130
9.4.	Relation between micropore volume and gas species concentrations	134
9.5.	Rating of the catalytic activity	135
9.6.	Error estimation	137
9.7.	List of samples and preparation parameters	138
9.8.	Photographs of the experimental setup.....	140
10.	List of publications	143
