LIST OF FIGURES ..... **xiv**

LIST OF TABLES ..... **xviii**

SUMMARY **1**

ZUSAMMENFASSUNG **2**

1 INTRODUCTION **3**

1.1. VIOLACEIN AND DEOXYVIOLACEIN 3

1.1.1. Biotechnological and therapeutic potential of violacein and deoxyviolacein *3*

1.2. E. COLI AS INDUSTRIAL PRODUCTION HOST 7

1.3. PHYSIOLOGY AND METABOLISM OF E. COLI 8

1.3.1. Transport and metabolism of glucose, L-arabinose and glycerol *10*

1.3.2. Metabolic pathways of the central metabolism *14*

1.3.3. Anapleurotic reactions *20*

1.3.4. L-Tryptophan biosynthesis *21*

1.4. ESCHERICHIA COLI AS HOST FOR VIOLACEIN AND DEOXYVIOLACEIN PRODUCTION 24

1.4.1. Tools for genetic engineering *25*

1.4.2. Heterologous production of violacein and deoxyviolacein *27*

2 MATERIALS AND METHODS **31**

2.1. DEVELOPMENT OF METHODS FOR SEPARATION AND QUANTIFICATION OF VIOLACEIN AND DEOXYVIOLACEIN 31

2.1.1. Organisms and growth conditions *31*

2.1.2. Preparation of pure violacein and deoxyviolacein *31*

2.1.3. Quantification of violacein and deoxyviolacein *32*

2.1.4. Estimation of extinction coefficients *32*

2.2. SYSTEMS METABOLIC ENGINEERING OF ESCHERICHIA COLI FOR PRODUCTION OF VIOLACEIN AND DEOXYVIOLACEIN FROM L-ARABINOSE 32

2.2.1. Strains and plasmids *32*

2.2.2. Construction of the violacein production plasmid *33*

2.2.3. Construction of the deoxyviolacein production plasmid *36*

2.2.4. Genomic integration of the vioD gene *37*

2.2.5. Transduction of target constructs *37*

2.2.6. Growth media *39*

2.2.7. Cultivation in shake flasks *40*

2.2.8. Fed-batch production in bioreactor *40*

2.2.9. Quantification of cell concentration *41*

2.2.10. Quantification of violacein and deoxyviolacein *41*

2.2.11. Quantification of sugars and organic acids *42*

2.2.12. Intracellular amino acids *42*

2.2.13. Extraction and crystallization of violacein *43*
2.3. SYSTEMS METABOLIC ENGINEERING OF ESCHERICHIA COLI FOR PRODUCTION OF DEOXYVIOLACEIN FROM GLYCEROL 43
2.3.1. Strains and plasmids *43*
2.3.2. Genetic engineering *44*
2.3.3. Growth media *45*
2.3.4. Microplate cultivation *46*
2.3.5. Shake flask cultivation *47*
2.3.6. Fed-batch cultivation *47*
2.3.7. Quantification of cell concentration *47*
2.3.8. Quantification of sugars, glycerol and acetate *48*
2.3.9. Quantification of deoxyviolacein *48*
2.3.10. Purification of deoxyviolacein *48*
2.3.11. GC-MS labelling analysis *48*
3 RESULTS 50
3.1. HPLC-BASED SEPARATION AND QUANTIFICATION OF VIOLACEIN AND DEOXYVIOLACEIN 50
3.1.1. Evaluation of photometric measurement of crude violacein *50*
3.1.2. Development of an HPLC method for quantification of violacein and deoxyviolacein *51*
3.1.3. Quantification of violacein and deoxyviolacein in microbial cultures *52*
3.2. SYSTEMS METABOLIC ENGINEERING OF ESCHERICHIA COLI FOR PRODUCTION OF VIOLACEIN AND DEOXYVIOLACEIN 53
3.2.1. Construction of a basic strain for deoxyviolacein production *53*
3.2.2. Evaluation of deoxyviolacein and violacein analytics *55*
3.2.3. Impact of temperature and chaperone co-expression on deoxyviolacein production by recombinant E. coli *57*
3.2.4. Quantification of intracellular precursor availability by targeted metabolite analysis *58*
3.2.1. Design of feedback-resistant enzymes in supporting pathways *60*
3.2.2. Metabolic engineering of tryptophan supply *60*
3.2.3. Metabolic engineering of the chorismate supply *62*
3.2.4. Metabolic engineering of erythrose 4-phosphate supply *63*
3.2.5. Metabolic engineering of serine supply *63*
3.2.6. Evaluation of the capacity of carbon core metabolism and the heterologous deoxyviolacein pathway *64*
3.2.7. Fed-batch production of deoxyviolacein in E. coli dVio-6 from L-arabinose as carbon source *64*
3.2.8. Elimination of L-arabinose metabolism in producing E. coli *65*
3.2.9. Verification of deletion of the gene of the tryptophan repressor, TrpR *68*
3.2.10. Evaluation of deoxyviolacein production on different carbon sources *68*
3.2.11. Investigation of remaining L-arabinose turnover in E. coli ΔaraBAD using ^{13}C labeling experiments *69*

3.2.12. Glycerol-based fed-batch production of deoxyviolacein by E. coli dVio-8 ..... *71*
3.2.13. Extension of the product spectrum to violacein *72*
3.2.14. Production performance of the designed violacein mutant in a fed-batch process *73*

4 DISCUSSION **75**

4.1.1. HPLC method for quantification of violacein and deoxyviolacein *75*
4.1.2. The synthetic E. coli based producers enable efficient and safe production of violacein and deoxyviolacein *75*
4.1.3. Systems metabolic engineering of supporting pathways drives secondary metabolite production *76*
4.1.4. The arabinose-inducible system mediates stable expression of the heterologous pathway *76*
4.1.5. The comparative evaluation of deoxyviolacein and violacein production should consider the analytical method used *77*
4.1.6. Production of deoxyviolacein using glycerol as carbon source *78*

5 CONCLUSIONS AND OUTLOOK **81**

6 REFERENCES **83**

7 APPENDIX **98**

7.1. SUPPLEMENTARY INFORMATION 98
7.1.1. Construction of strains TRP1 to TRP6 ..... *98*
7.1.2. Cloning of vector pJNNmod *107*
