

## TABLE OF CONTENTS

<b>1</b>	<b>Introduction</b> .....	<b>1</b>
<b>2</b>	<b>Fundamentals</b> .....	<b>7</b>
2.1	Microemulsions .....	7
2.1.1	Phase behaviour of binary mixtures .....	7
2.1.2	The phase prism – ternary mixtures .....	8
2.1.3	Curvature of the amphiphilic film and microstructure .....	12
2.2	Microemulsions with supercritical carbon dioxide .....	16
2.2.1	Flourinated surfactants and their impact on CO <sub>2</sub> -microemulsions .....	16
2.2.2	CO <sub>2</sub> -microemulsions as templates for nanoporous foams .....	17
2.2.3	Aging phenomena and the concept of anti-ageing agents .....	19
2.3	Thermoresponsive polymers .....	23
2.3.1	Emulsion polymerisation.....	23
2.3.2	Swelling of poly-( <i>N</i> -isopropyl)acrylamide.....	27
2.3.3	Microgel applications .....	29
2.4	Neutron scattering .....	31
2.4.1	Small angle neutron scattering .....	32
2.4.2	Neutron contrast variation .....	34
2.4.3	Raw data treatment and data recording for static measurements .....	36
2.4.4	Data analysis: Description of scattering curves.....	38
2.4.5	The stroboscopic high pressure SANS cell .....	51
2.4.6	Data recording for kinetic measurements .....	55
2.4.7	Time Involved Small Angle Neutron Scattering Experiments (TISANE) .....	58
2.5	Light scattering.....	64
2.5.1	Dynamic light scattering.....	65
2.5.2	Dynamic light scattering under high pressure .....	68
2.5.3	Static Light Scattering .....	69
<b>3</b>	<b>Cyclohexane as hydrophobic additive to supercritical fluorinated microemulsions</b> .....	<b>71</b>
3.1	Microstructure of CO <sub>2</sub> /cyclohexane-microemulsions with flourinated surfactants .....	71
3.1.1	Phase behaviour.....	71
3.1.2	Systematic SANS contrast variation .....	73
3.1.3	Data evaluation I: Model-dependent analytical fitting functions .....	77
3.1.4	Data evaluation II: Model-independent Fourier transformation.....	79
3.1.5	Measurements at elevated temperature and $w_B$ .....	86
3.1.6	Conclusion.....	88
3.2	Kinetics of structural changes of CO <sub>2</sub> -microemulsions.....	90
3.2.1	Phase behaviour and microstructure.....	90
3.2.2	Pressure jumps within the thermodynamically stable state .....	99
3.2.3	Influence of cyclohexane on changes of microstructure .....	108
3.2.4	Pressure jumps to thermodynamically unstable states.....	110
3.2.5	Influence of cyclohexane on kinetics of demixing processes.....	118
3.3	The TISANE option .....	118
3.3.1	TISANE experiments: State of the art.....	118
3.3.2	Improvements of the SHP-SANS cell .....	118
3.3.3	Applying the TISANE option to microemulsions .....	121

3.4	Conclusion.....	125
<b>4</b>	<b>Influence of hydrostatic pressure on PNIPAM particles.....</b>	<b>129</b>
4.1	PNIPAM particles at elevated hydrostatic pressure .....	129
4.1.1	Dynamic light scattering.....	130
4.1.2	Small Angle Neutron Scattering.....	134
4.1.3	Static light scattering .....	140
4.2	Swelling and deswelling kinetics induced by sudden pressure jumps .....	144
4.3	Microfluidics .....	151
4.3.1	Newly developed microfluidic setup for temperature jumps .....	151
4.3.2	Results of temperature jump experiments .....	152
4.3.3	Discussion .....	155
4.4	Conclusion.....	156
<b>5</b>	<b>Microemulsions and PNIPAM under mutual confinement.....</b>	<b>157</b>
5.1	Phase behaviour.....	157
5.2	Light and neutron scattering.....	159
5.3	First kinetic experiment with microemulsions and PNIPAM .....	163
5.4	Conclusion.....	163
<b>6</b>	<b>Summary.....</b>	<b>165</b>
<b>7</b>	<b>Appendix.....</b>	<b>169</b>
7.1	Abbreviations and Symbols.....	169
7.2	Experimental methods .....	175
7.2.1	Determination of the Phase Boundaries of Microemulsions .....	175
7.2.2	Neutron Scattering.....	176
7.2.3	Light Scattering .....	178
7.2.4	Emulsion polymerisation.....	179
7.2.5	Microfluidics .....	180
7.3	Chemicals and Substances.....	181
7.4	Tables .....	182
<b>8</b>	<b>Bibliography .....</b>	<b>185</b>
