

Contents

| | | |
|----------|--|-----------|
| 1 | Introduction | 1 |
| 2 | Design and Synthesis of IHF Mimicking Peptides Containing Two DNA Recognition Units | 5 |
| 2.1 | The Integration Host Factor | 5 |
| 2.2 | Recognition and Bending of Double Stranded DNA | 7 |
| 2.3 | General Design of a Small Peptide Mimicking IHF-like DNA Binding and Bending | 10 |
| 2.4 | IHF Mimicking Peptides Containing Two DNA Recognition Units | 12 |
| 2.5 | Synthesis of Artificial Amino Acids to Participate in the Ligation | 14 |
| 2.6 | Synthesis of Dimeric IHF Mimicking Peptides by Applying [3+2] Cycloaddition | 17 |
| 2.7 | IHF Homodimer Based on Amide Bonds | 22 |
| 3 | Novel Photocleavable Auxiliaries for Application in PNA/PNA Mediated Ligation Strategy | 29 |
| 3.1 | Principles of PNA/PNA Mediated Ligation Strategy | 29 |
| 3.2 | Nucleobase Templated Reactions | 31 |
| 3.3 | Peptide Nucleic Acid | 33 |
| 3.4 | Chemical Strategies to Ligate and Functionalize Peptides | 35 |
| 3.5 | Photolabile <i>o</i> -Nitrobenzene Derivatives | 37 |
| 3.6 | Synthesis of a Photocleavable Auxiliary Based on <i>o</i> -Nitrobenzene | 40 |
| 3.7 | Synthesis of a Photolabile Auxiliary Based on 6-Nitrovalerate | 44 |
| 3.8 | Synthesis of a Photolabile Auxiliary Bearing an Azide Residue | 54 |
| 3.9 | Caged PNA/Peptide Conjugates for Selective Ligation via Disulfidebridge Formation | 61 |
| 3.10 | Light Inducible Nanoparticle Delivery into Cells | 74 |
| 3.11 | Application of the Photosensitive β -Azido Nitroveratryl Linker in SPPS | 81 |
| 4 | Targeting Substrate-Kinase Pairs by Covalent Ligation with an ATP Mimicking Crosslinker | 87 |
| 4.1 | Selective Crosslinkers for Identifying New Substrate-Kinase Pairs | 87 |

| | | |
|----------|--|------------|
| 4.2 | Synthesis of Substrate-Kinase Crosslinker | 90 |
| 4.3 | Crosslinking Experiments | 93 |
| 5 | Conclusion | 95 |
| 6 | Experimental Part | 101 |
| 6.1 | Materials and General Methods | 101 |
| 6.2 | Spectroscopic Methods | 104 |
| 6.3 | Solid Phase Synthesis | 106 |
| 6.4 | Synthesis of Modified Amino Acids and Peptides for IHF Mimicking Peptides . | 111 |
| 6.4.1 | IHF Mimicking Peptide via [3+2] Cycloaddition | 111 |
| 6.4.2 | IHF Mimicking Peptide Based on Amide Bonds | 135 |
| 6.5 | Development of Novel Photocleavable Auxiliaries | 152 |
| 6.5.1 | Synthesis of Photolabile Auxiliaries for Application in a Novel Ligation Strategy | 152 |
| 6.5.2 | Synthesis of Caged COSS Nanoparticle | 224 |
| 6.5.3 | Application of Photosensitive β -Azido Nitroveratryl Linker in SPPS . . | 229 |
| 6.6 | Synthesis of Substrate-Kinase Crosslinker | 234 |
| 7 | Abbreviations | 241 |
| 8 | Appendages | 245 |
| | References | 247 |
| | Acknowledgments | 263 |
