

# Table of Contents

List of Figures .....	iv
List of Tables.....	vi
Acronyms .....	viii
<b>A. Foundations.....</b>	<b>1</b>
<b>I. Introduction .....</b>	<b>2</b>
I.1 Motivation.....	2
I.2 Research Gaps and Research Questions.....	4
I.3 Structure of the Thesis .....	7
I.4 Research Context and Design.....	12
I.5 Anticipated Contributions.....	13
<b>II. Background .....</b>	<b>14</b>
II.1 Fundamentals of Demand-Side Integration .....	14
II.2 Demand-Side Integration for Electric Vehicles.....	19
II.3 Case Study BESIC .....	23
<b>B. Assessment of Demand-Side Integration Programs.....</b>	<b>29</b>
<b>I. Supply-Side Perspective on DSI Programs – Study 1: The Value of IS to Ensure the Security of Energy Supply.....</b>	<b>30</b>
I.1 Introduction .....	31
I.2 Research Background and Related Work.....	31
I.3 Research Design.....	32
I.4 Assumptions for an Assessment of the Energetic Impacts on Power Plant Capacities .....	34
I.5 Assumptions for an Assessment of the Economic Impacts .....	35
I.6 Results .....	37
I.7 Conclusion .....	39

<b>II.</b>	<b>Demand-Side Perspective on DSI Programs .....</b>	<b>41</b>
<b>1</b>	<b>Study 2: Applying Demand Response Programs for EV Fleets .....</b>	<b>42</b>
1.1	Introduction .....	43
1.2	Background .....	44
1.3	Designing a Demand Response System for Fleet Operators.....	46
1.4	Research Methodology.....	48
1.5	Results .....	52
1.6	Discussion.....	53
1.7	Conclusion .....	54
<b>2</b>	<b>Study 3: Assessing the Potential of Different Charging Strategies for Electric Vehicle Fleets in Closed Transport Systems.....</b>	<b>56</b>
2.1	Introduction .....	57
2.2	Material and Method.....	58
2.3	Results .....	69
2.4	Discussion.....	72
2.5	Conclusion and Policy Implications.....	74
<b>3</b>	<b>Study 4: Simulation of Power Demand in a Maritime Container Terminal using an Event-Driven Data Acquisition Module.....</b>	<b>77</b>
3.1	Maritime Container Terminals and Electric Mobility .....	78
3.2	Container Terminal Simulation Models and Energy-Related Simulation Tools.....	79
3.3	Towards an Event-Driven Power Demand Simulation Module.....	81
3.4	Simulation-Based Energy Demand at CTA.....	85
<b>4</b>	<b>Study 5: Demand-Side Integration for Electric Transport Vehicles .....</b>	<b>87</b>
4.1	Introduction .....	88
4.2	Demand-Side Integration.....	89
4.3	Analysis of Demand-Side Integration Programs .....	93
4.4	Results .....	101
4.5	Discussion.....	105
4.6	Conclusion .....	107
<b>5</b>	<b>Study 6: Using Electric Transport Vehicles within Closed Transport Systems .....</b>	<b>109</b>
5.1	Introduction .....	110
5.2	Related Work.....	111
5.3	Material and Method.....	112
5.4	Results .....	121
5.5	Discussion.....	125
5.6	Conclusion and Further Research .....	128

<b>III.</b>	<b>Recommendations for Actions for Policymakers – Study 7: Shaping the Future Energy Market.....</b>	<b>130</b>
III.1	Introduction .....	131
III.2	Methodology.....	132
III.3	Case Study Research Design.....	132
III.4	Main Result and Discussion .....	133
III.5	Conclusion and Future Outlook .....	135
<b>C.</b>	<b>Contributions.....</b>	<b>137</b>
<b>I.</b>	<b>Findings and Results .....</b>	<b>138</b>
I.1	Findings Regarding the Supply Side of the Energy Sector.....	138
I.2	Findings Regarding the Demand Side of the Energy Sector .....	139
I.3	Findings Regarding Policymakers .....	141
I.4	Aggregated Findings and Results.....	142
<b>II.</b>	<b>Implications for Theory and Practice .....</b>	<b>144</b>
II.1	Managerial Implications.....	144
II.2	Policy Implications.....	147
II.3	Implications for Energy Economic Research .....	148
<b>III.</b>	<b>Conclusion and Further Research Opportunities .....</b>	<b>151</b>
III.1	Limitations .....	153
III.2	Further Research Opportunities .....	154
	References.....	159
	Appendix .....	xi
