Table of contents

Summary	9
Zusammenfassung	12
List of Abbreviations	15
CHAPTER 1. General introduction.....	17
1.1. Description of mycorrhizal symbiosis	18
1.1.1. Arbuscular mycorrhizas.....	18
1.1.2. Ectomycorrhizas.....	20
1.2. Nutrient limitations in forest ecosystems.....	21
1.2.1. Nitrogen	21
1.2.2. Phosphorus	22
1.3. Leaf litter and leaf litter decomposition	23
1.4. Earthworm impact on plant nutrition.....	24
1.5. Objectives of the present thesis	25
1.6. References	28
CHAPTER 2. Impacts of earthworms on nitrogen acquisition from leaf litter by arbuscular mycorrhizal ash and ectomycorrhizal beech trees	35
2.1. Introduction	36
2.2. Materials and Methods.....	39
2.2.1. Plant material and experimental set up	39
2.2.2. Harvest	40
2.2.3. Mycorrhizal analysis.....	41
2.2.4. Isotope analysis of plant tissues	42
2.2.5. Statistical analysis	42
2.3. Results.....	43
2.3.1. Impact of earthworms on mycorrhizal root colonization and ectomycorrhizal fungal community structure	43
2.3.2. Effect of earthworms on plant acquisition of N from leaf litter	46
2.4. Discussion.....	49
2.4.1. Earthworms do not affect mycorrhizal colonization but modify EM community composition	49
2.4.2. Impact of EWs on plant nitrogen acquisition from leaf litter as affected by litter quality and mycorrhiza	51

2.5. References	53
2.6. Declaration	58
CHAPTER 3: Chemical profiles of beech roots and their ectomycorrhizal fungi influenced by leaf litter quality	59
3.1. Introduction	60
3.2. Material and methods	62
3.2.1. Site description and sample collection	62
3.2.2. Morphotyping	63
3.2.3. rDNA-ITS region sequencing	63
3.2.4. Sample preparation for FTIR measurements	66
3.2.5. FTIR spectra acquisition and analysis.....	66
3.3. Results	68
3.3.1. Leaf litter species FTIR-ATR signature disappeared one year after litter deposition in the field	68
3.3.2. Ash leaf litter quality leads to differences in soil FTIR-ATR spectra.....	74
3.3.3. Leaf litter identity differentially affects FTIR-ATR spectra of distinct EM forming ectomycorrhiza fungi	75
3.3.4. Ash leaf litter results in a signature on FTIR-ATR spectra of beech roots.....	78
3.4. Discussion.....	82
3.4.1. Chemical profiles of different tree species leaf litter after one-year field deposition	82
3.4.2. The effects of leaf litter type on FTIR-ATR patterns of ectomycorrhizal fungal	83
3.5. Reference	86
3.6. Declaration	92
CHAPTER 4. Phenology and photosynthesis in European beech (<i>Fagus sylvatica</i> L.) in two forest soils with contrasting P contents	93
4.1. Introduction	94
4.2. Materials and Methods.....	95
4.2.1. Site characteristics	95
4.2.2. Plant material.....	96
4.2.3. Monitoring of growth and phenology.....	96
4.2.4. Determination of photosynthesis and stomatal indices.....	97
4.2.5. Plant harvest	97
4.2.6. Phosphorus measurements	98
4.2.7. Statistical analysis	98

Table of contents

4.3. Results	98
4.3.1. Growth and phenology	98
4.3.2. Total phosphorus concentrations in beech tissues and soluble phosphorus in transport tissues	100
4.3.3. Low P nutrition affects the gas exchange	102
4.4. Discussion.....	105
4.5. References	108
4.6. Declaration.....	111
CHAPTER 5: Synopsis.....	113
Reference of synopsis	117
Supplement 1.....	119
Supplement 2.....	122
Declaration.....	128
Acknowledgements.....	129
Curriculum Vitae	131
