| <b>List of Figures</b>  | <b>xi</b>   |
| <b>List of Tables</b>   | <b>xiii</b> |
| <b>1 Introduction</b>   | <b>1</b>    |
| 1.1 Motivation . . . . .  | 1           |
| 1.2 Research Efforts and Existing Supersonic Projects . . . . .       | 2           |
| 1.3 Thesis Outline . . . . .  | 3           |
| <b>2 Multidisciplinary Aircraft Design</b>                            | <b>5</b>    |
| 2.1 The Aircraft Design Process . . . . .                             | 5           |
| 2.2 Aircraft Design Tools at a Glance . . . . .                       | 7           |
| 2.3 PrADO - An Aircraft Design and Optimisation Environment . . . . . | 7           |
| 2.3.1 The Aerodynamic Module . . . . .                                | 8           |
| 2.3.2 The Structural Analysis Module . . . . .                        | 9           |
| 2.3.3 The Propulsion Module . . . . .                                 | 9           |
| <b>3 Fundamentals</b>   | <b>11</b>   |
| 3.1 Aerodynamic Analysis . . . . .                                    | 11          |
| 3.1.1 Navier-Stokes Equations . . . . .                               | 11          |
| 3.1.2 Reynolds-Averaged Navier-Stokes Equations . . . . .             | 13          |
| 3.1.3 Euler Equations . . . . .                                       | 14          |
| 3.1.4 Aerodynamic Drag . . . . .                                      | 15          |
| 3.2 Estimation of Structural Mass and Structural Sizing . . . . .     | 16          |
| 3.2.1 The Finite Element Method . . . . .                             | 17          |
| 3.2.2 Fully Stressed Design . . . . .                                 | 18          |
| 3.2.3 Failure Criteria for Composite Material . . . . .               | 19          |
| 3.2.4 The Resizing Algorithm . . . . .                                | 21          |
| 3.2.5 Smoothing of Design Variables . . . . .                         | 24          |
| 3.3 Propulsion . . . . .  | 25          |
| 3.3.1 Mixed-Stream Turbofan Engine . . . . .                          | 26          |
| <b>4 Modelling Aspects</b>  | <b>31</b>   |
| 4.1 Aerodynamic Model . . . . .                                       | 31          |
| 4.2 Structural Model . . . . .  | 34          |
| 4.2.1 Used Finite Element Types . . . . .                             | 35          |
| 4.2.2 A Surrogate Stringer Model . . . . .                            | 36          |
| 4.3 Loads, Load Cases and Boundary Conditions . . . . .               | 37          |

## Contents

|   |            |
|---|------------|
| <b>5 Verification</b>   | <b>41</b>  |
| 5.1 Verification of Aerodynamics . . . . .  | 41         |
| 5.2 Verification of the Structural Sizing Module . . . . .                          | 46         |
| 5.3 Verification of the Tool Chain . . . . .  | 50         |
| <b>6 Remarks on Temperature Effects in Supersonic Flight</b>                        | <b>55</b>  |
| 6.1 Theory . . . . .  | 55         |
| 6.1.1 A Handbook Method for Temperature Prediction . . . . .                        | 55         |
| 6.1.2 CFD-Analysis for Temperature Prediction . . . . .                             | 57         |
| 6.2 Model Description . . . . .   | 57         |
| 6.2.1 Geometry . . . . .  | 57         |
| 6.2.2 CFD Model . . . . .   | 58         |
| 6.3 Results . . . . .   | 59         |
| 6.3.1 Temperature Field . . . . .   | 59         |
| 6.3.2 Mach Number, Altitude and Angle of Attack Dependency of Temperature . . . . . | 63         |
| 6.3.3 Influence of the Results on Materials Selection . . . . .                     | 65         |
| <b>7 Application of the Preliminary Design Process</b>                              | <b>69</b>  |
| 7.1 The Market and an Evaluation Methodology . . . . .                              | 69         |
| 7.2 Requirements . . . . .  | 70         |
| 7.2.1 Remarks on the Supersonic Overland Flight Ban . . . . .                       | 70         |
| 7.2.2 Cruise Mach Number . . . . .  | 70         |
| 7.2.3 Range, Payload and Cabin . . . . .  | 71         |
| 7.2.4 Additional Requirements and Requirements Summary . . . . .                    | 73         |
| 7.3 Basic Aircraft . . . . .  | 75         |
| 7.3.1 Model Description . . . . .   | 75         |
| 7.3.2 Results . . . . .   | 77         |
| 7.4 Parameter Studies . . . . .   | 86         |
| 7.4.1 Variation of the Cruise Mach Number and Design Range . . . . .                | 87         |
| 7.4.2 Performance Studies for Subsonic and Supersonic Cruise Conditions . . . . .   | 94         |
| <b>8 Summary and Conclusions</b>  | <b>97</b>  |
